

Publication Summary

Abortion Statistics

Year ending 31 December 2010

Publication date - 31 May 2011

About this Release

The Abortion Statistics are published annually and are derived from the Notifications to the Chief Medical Officer for Scotland under the Abortion Act 1967. This release includes annual data to December 2010.

Key Points

- For the past two years there has been a fall in the number and rate of abortions with 12,826 in 2010 compared to 13,108 in 2009 and 13,902 in 2008 (representing rates of 12.3 per 1000 women aged 15-44 in 2010, 12.6 in 2009 and 13.3 in 2008). This fall is a change to the overall pattern of increase since the implementation of the 1967 Abortion Act, although small dips for short periods have been observed before.
- As in previous years, the rate of terminations in 2010 was highest in younger women, 16-19 (21.4 per 1000) and those aged 20-24 (22.4 per 1000). Lower rates are seen in the older age groups; women aged 25-29 (15.3 per 1000); aged 30-34 (10.8 per 1000); aged 35-39 (6.3 per 1000) and in women aged over 40 (2.1 per 1000).
- The proportion of early terminations has been rising steadily in recent years, with 65.2% of all terminations performed at less than 9 weeks in 2010, compared to 62.2% in 2009. There has also been a sustained increase in the use of medical methods compared to surgical terminations.
- In 2010, the rate of abortions continues to show a clear link with the level of deprivation. In areas of high deprivation the rate is 16.0 per 1000, nearly double the rate of 9.2 per 1000 for the least deprived areas of Scotland.
- More than a quarter (28.4%) of the 12,826 women having a termination in 2010 had a previous termination. The proportion of women having had a previous termination varies across NHS boards from 21.3% in the NHS Island Boards (Orkney, Shetland and Western Isles) to 35.2% in NHS Tayside.

- In 2010, the vast majority (12,074; 94.0%) of terminations were undertaken under Ground C. There were 142 terminations carried out under Ground E of which 23 were for Down's syndrome, 13 for other chromosomal conditions, 18 for anencephaly with the remaining 88 being for spina bifida and other conditions.

Background

There is a legal requirement to notify the Chief Medical Officer in Scotland of all terminations carried out in Scotland. The Information Services Division is responsible for the collation of data derived from notifications of abortions on behalf of the Chief Medical Officer in Scotland.

All notifications are validated prior to analysis. Occasionally, this results in information queries being sent to a named contact in the unit where the termination occurred. Data quality is, therefore, considered to be high, although occasional omissions and administrative errors in submitting notification forms are inevitable, leading to some under-reporting. All late submissions of notification forms are included in the following year's statistics release as revised figures.

In recent years we have introduced data on abortions carried out on gestations less than 9 completed weeks (63 days) to monitor the NHS Quality Improvement Scotland (now NHS Healthcare Improvement Scotland) standard introduced in March 2008, that 70% of women seeking terminations of pregnancy undergo the procedure at less than 9 completed weeks (ie less than 63 days) gestation.

About ISD

Scotland has some of the best health service data in the world combining high quality, consistency, national coverage and the ability to link data to allow patient based analysis and follow up.

Information Services Division (ISD) is a business operating unit of NHS National Services Scotland - and has been in existence for over 40 years. We are an essential support service to NHSScotland and the Scottish Government Health Department and others, responsive to the needs of NHSScotland as the delivery of health and social care evolves.

Official Statistics

Information Services Division (ISD) is the principal and authoritative source of statistics on health and care services in Scotland. ISD is designated by legislation as a producer of 'Official Statistics'. Our official statistics publications are produced to a high professional standard and comply with the Code of Practice for Official Statistics. The Code of Practice is produced and monitored by the UK Statistics Authority which is independent of Government. Under the Code of Practice, the format, content and timing of statistics publications are the responsibility of professional staff working within ISD.

Further information on ISD's statistics, including compliance with the Code of Practice for Official Statistics, and on the UK Statistics Authority, is available on the [ISD website](#).
